

Universal Access to Health Care POSITION STATEMENT

Approved by the Board of Trustees, March 2004

"Policy documents are approved by the APA Assembly and Board of Trustees...These are ... position statements that define APA official policy on specific subjects..." -- *APA Operations Manual*.

It is the policy of the American Psychiatric Association to support universal access to health care, specifically including non-discriminatory coverage of treatment for mental illness, including substance use disorders, for all Americans. The American Psychiatric Association will advocate vigorously for this at local, state and national levels.
